

Grizzlies of the Khutzeymateen

Instructional Photo Tour 2023

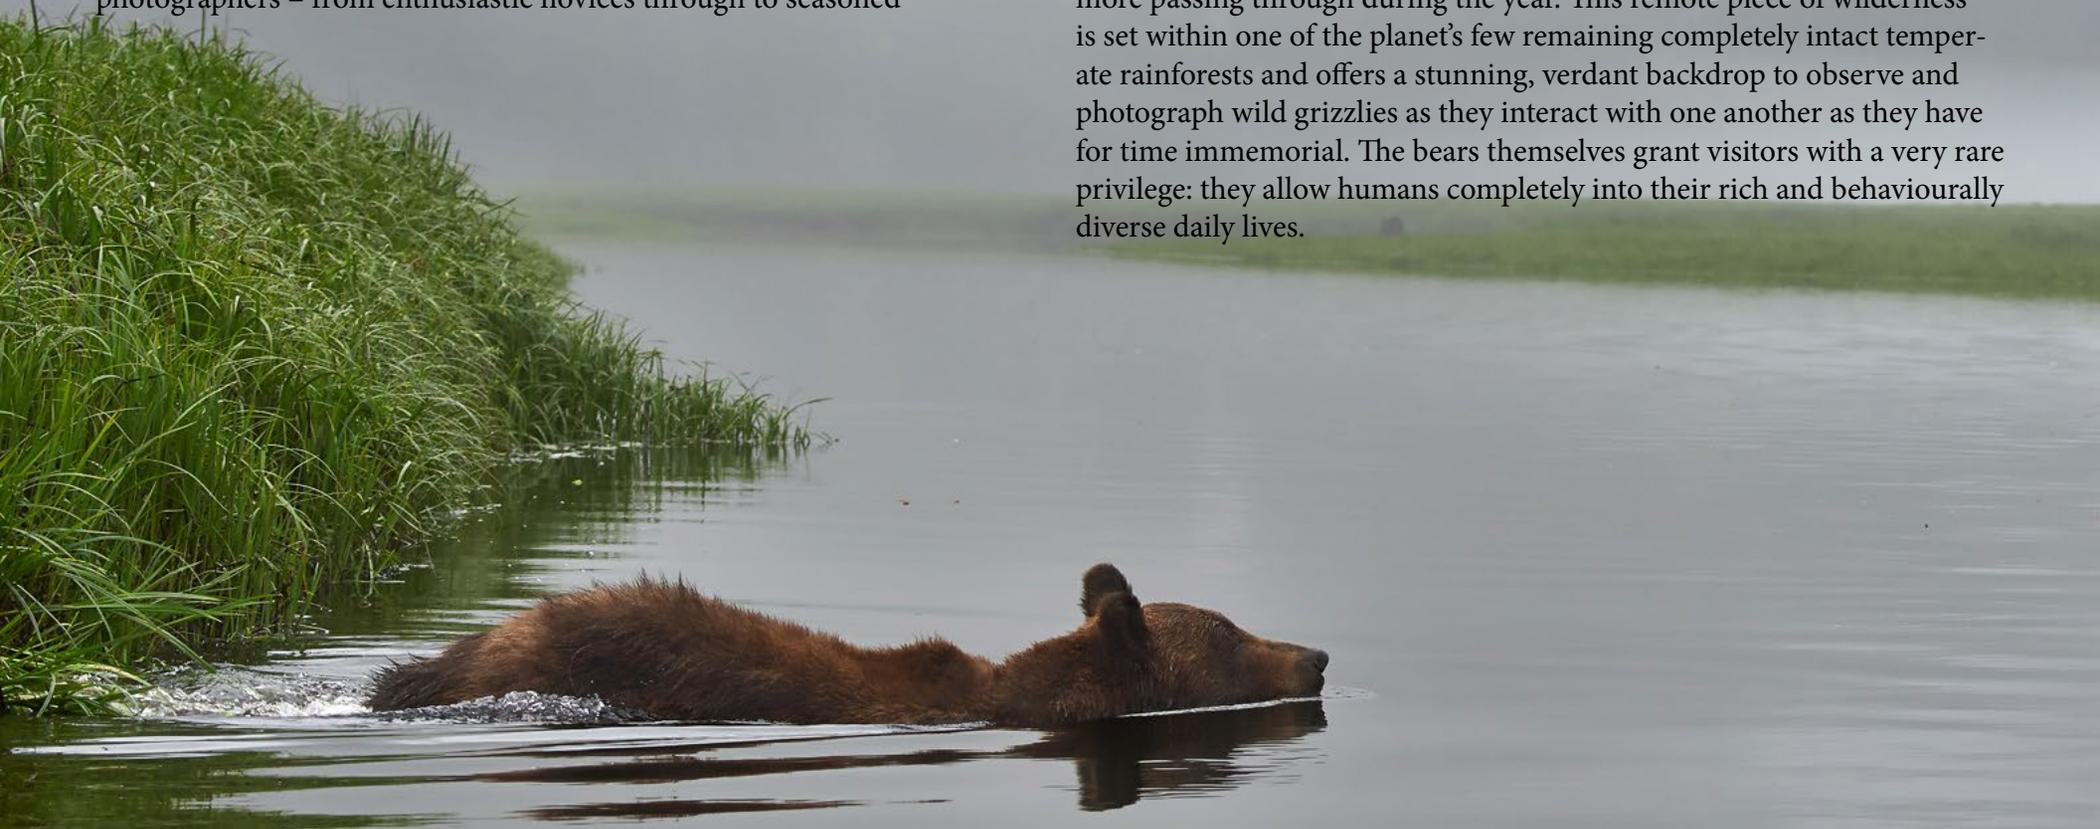

The *Grizzlies of the Khutzeymateen Instructional Photo Tour 2023* combines pre-trip professional photography instruction with 5 full days of photographing grizzlies in the most breathtaking environment imaginable. You will be provided with the opportunity, the conceptual and creative tools, and the techniques needed to capture fantastic images of North America's top land-based carnivore – the Grizzly Bear.

Photography Instruction. The instructional component on this photo tour will take place in the weeks before the trip. Starting in 2022 I have taken the pre-trip photography instruction online, allowing you to take in the sessions in the comfort of your home. And, by going online and offering the instruction in the weeks before the trip you'll have time to reflect upon and digest the material long before you are face-to-face with the subjects. The two online sessions will be of benefit to all levels of photographers – from enthusiastic novices through to seasoned

professionals. I'll discuss both the technical and creative aspects of wildlife photography as well as the specifics and logistics of photographing wildlife and scenery within the Great Bear Rainforest. While the instructional material will be agnostic with respect to camera brand and camera style (e.g., mirrorless vs. DSLR) it will be assumed that most participants will be bringing either digital SLR's or mirrorless cameras.

The Khutzeymateen Grizzly Sanctuary. The 39,000 hectare (96,000 acre) Khutzeymateen Grizzly Sanctuary is Canada's only Grizzly Bear sanctuary and is located at the tip of a long and remote inlet on the northern coast of British Columbia. There are no roads, settlements, or even campsites in the region – it is true pristine wilderness. The bulk of the sanctuary is closed to the public – only two professional guides have licenses to lead very small groups into the heart of this majestic and globally unique ecosystem. The inlet is home to about 50 resident grizzlies, with many more passing through during the year. This remote piece of wilderness is set within one of the planet's few remaining completely intact temperate rainforests and offers a stunning, verdant backdrop to observe and photograph wild grizzlies as they interact with one another as they have for time immemorial. The bears themselves grant visitors with a very rare privilege: they allow humans completely into their rich and behaviourally diverse daily lives.

The Khutzeymateen Estuary. Accessible only at high tide, the Khutzeymateen estuary is a grass and wildflower covered grizzly garden (complete with water features!). We'll split our time in the field between the estuary and several of the alluvial fans found in the main Khutzeymateen Inlet.

Stalking the Shoreline.

Be one of under 200 people – and far, far fewer photographers – annually gifted with the intimate experience of sharing the lives of the Grizzlies of the Khutzeymateen.

To explore and photograph this spectacular valley we will use a 60-foot Gulf Commander expedition power boat (the *Afterglow I*) as our floating basecamp and then travel into the depths of the sanctuary using a motorized inflatable Zodiac®.

About the Photography “Style” On This Photo Tour. On this trip – as on our other photo tours – this is a “*photography in true wilderness*” experience. This means we will spend the bulk of our time in isolated and remote

wilderness and away from other humans (and other photographers). We’ll have to “track down” our subject matter without the help of other outfitters, spotters or real-time online apps listing recent sightings (i.e., there is no “network of sightings” for us to plug into!). Additionally we’ll have no “set-up” situations where we can set up in a specific location ahead of time and with the knowledge that a certain species will predictably appear and pose for us! The advantage of our “*photography in true wilderness*” approach is that it produces a far more unique and personalized experience and it can often lead to more original and compelling photos. A possible downside is that it means we don’t know the specifics of the shooting conditions ahead of time and thus may put more onus on the photographer to

make snap technical and creative decisions in a field setting. This means it may challenge – and encourage you to expand – your photographic skills more than other photo tours do!

Our Wildlife Subject Matter: While this is a *photography-in-true-wilderness* trip, we are definitely headed into a target-rich environment! Grizzlies are the dominant terrestrial mammal in this region and our primary target, but there are other species that we may encounter and, when the opportunity presents itself, photograph.

Here’s a quick run down of both our “*most likely*” wildlife subjects and our “*less likely but possible*” wildlife subjects:

A. Most Likely Subjects (50% or greater probability of encounter):

- Grizzly Bears
- Black Bears
- Harbour Seals
- Bald Eagles
- Great Blue Herons
- Harlequin Ducks
- Herring Gulls
- American Mink
- Canada Geese
- Asst’d shorebirds
- Asst’d songbirds

B. Less Likely But Possible Subjects (<50% probability of encounter):

- Killer Whales
- Coastal Gray Wolves
- Humpback Whales
- River Otters
- American Marten

2023 Dates: June 13-19, 2023.

2023 Price: \$7699.00 CAD plus 5\$ GST.

What’s Included?

- Pre-trip online professional photography instruction
- All meals and accommodation beginning on the evening of Day 1 (see Itinerary)
- Float plane transportation both into and out of the Khutzeymateen
- A highly-experienced bear guide and professional photography guide
- Jaw-dropping scenery and fabulous bears!

Ghost of the Coast. Coastal Gray Wolves are not rare in the Khutzeymateen, but their secretive nature makes them a challenge to see or photograph. Nikon D4s with 400mm f2.8 VR. 1/500s @ f5.6. ISO 350. © Brad Hill – www.naturalart.ca

What's Not Included?

- Transportation between your home and Prince Rupert, BC
- Personal belongings and equipment as per “Gear Lists”
- Any meals and accommodation in Prince Rupert prior to Day 1
- Excess baggage charges from airlines
- Any extra personal expenses incurred because of weather, logistical delays, or delayed departures of chartered or scheduled aircraft
- Any gratuities for the crew of the *Afterglow*

What To Expect?

- Cool weather (daytime highs of about 15-18C or 59-65° fahrenheit); rain showers are likely but often short-lived (and sunny skies are NOT uncommon at this time of year)
- Totally calm water at our floating basecamp – seasickness is not an issue on this trip

- Very long hours of daylight (giving us ample time in the field)
- Unsurpassed Grizzly Bear photography opportunities
- Hearty, healthy and delicious food
- Always warm, always dry floating basecamp!

Accommodation: While in Prince Rupert (night of June 13) we will be staying at the Highliner Hotel & Conference Centre.

While in the Khutzeymateen we will be staying on the *Afterglow*, a spacious 60’ Gulf Commander expedition power boat.

Sample Itinerary

This is only a sample itinerary and how we actually spend our days when we’re in the Khutzeymateen may differ from below. Two factors interact to influence how we spend each day – the location of bears and the timing of the tides (we can only access some areas – such as the channels in

While common on all sides of Vancouver Island, Harbour Seals are exceptional photographic subjects! This seal was photographed in Pacific Rim National Park Reserve in April of 2019

Nikon D500 with Nikkor 500mm f5.6E PF lens.1/800s @ f5.6; ISO 900

© Brad Hill – www.naturalart.ca

the estuary – during high tides). Both of these factors change day-by-day.

Day 1 – June 13, 2023.

Arrive in Prince Rupert. Make your way to the Highliner Hotel & Conference Centre to check in and stow your gear. Official check-in time is 3 PM, but if your room is ready before that they will let you check in earlier. You can stow your luggage with them while waiting to check-in. If you arrive early in the day feel free to sightsee or check the town out. Plan on assembling in the lobby of the Highliner at 6 PM for an informal “meet & greet”. Shortly following this we will head out for dinner together.

Day 2 – June 14, 2023.

Early breakfast at the hotel, followed by an early float plane trip into the Khutzeymateen. Following meeting the crew and guides of the *Afterglow* and allocating the cabins, we will spend as much time as possible out in the Zodiac® photographing the bears. Photography instruction during our time in the Khutzeymateen will be offered very informally and will

largely be based on the questions and photographic issues faced by the participants. Note that it is very difficult to offer any instruction when actually working with the bears as we will have to remain as motionless and quiet as possible.

Days 3 through 6 – June 15-18, 2023.

In the Khutzeymateen. Very full days of bear photography and opportunistic photography instruction.

Day 7 – June 19, 2023.

Breakfast on the *Afterglow* followed by our return float plane trip back to Prince Rupert. After which you’ll be left with some awesome memories – and some awesome photos!

Our Ethical Stance – *Wildlife FIRST!*

Wildlife conservation is the primary reason for my involvement in wildlife photography. As such, *I place the welfare and value of our subjects above the value of any photograph of them.* This philosophy is embodied in my *Wildlife FIRST* rules of conduct that guide our actions during all my photo tours. These four simple ethical rules state that:

1. Ethical wildlife photographers should engage in *passive wildlife photography only*. This means striving to capture images of wildlife behaving as naturally as possible and without the photographer taking any actions to guide the subject(s) toward desirable settings and/or backdrops or elicit specific “poses”.
2. Ethical wildlife photographers should do nothing *intentional* to alter or influence the behaviour of their subjects for the purpose of **photography**. This includes not intentionally influencing their distribution in space or their behaviour. This translates into not engaging in any form of luring or baiting (or any other form of food supplementation). Additionally, it extends to not using any sound to alter the behaviour of the subject for the purpose of photography, including using predator and/or prey calls, song or vocalization playbacks, vocal clicking, or making any other sound to cause the subject to alter its ongoing behaviour and look at the photographer.
3. While conforming to and working within any legal guidelines determining minimum allowable approach distances, **ethical wildlife photographers should allow the wildlife subject – regardless of the**

Psssst! Don't Look Now, but...

Nikon D800 with 400mm f2.8G VR. 1/400s @ f5. ISO 400

© Brad Hill - www.naturalart.ca

species – to determine the subject-to-photographer distance it is comfortable with. This principle serves to reduce stress on the subject and also allows the capture of photographs of the subject behaving in a more natural, and often more interesting, fashion.

4. **Ethical wildlife photographers always consider both their *individual and the overall collective effects* photographic activities can have on the subject(s).** This includes being aware of *your total time spent with the wildlife subject(s)* and, whenever possible, *the total time spent with the subject by all photographers utilizing the subject*. In practice this means the photographer may have to withdraw from the subject and cease photographic efforts of it, especially if there is any indication that his or her presence is impacting on the subject's behavioural routine (including activities such as feeding, resting and/or sleeping,

caring for its offspring, etc.). This consideration is always important and may become even MORE important if multiple photographers or groups of photographers are simultaneously or sequentially sharing the same subject(s).

All photographers participating in my photo tours are expected to conform to these ethical rules.

All images in this trip compendium and the Natural Art Images website (www.naturalart.ca) were captured following these **Wildlife FIRST** rules of photographer conduct.

For more information about this amazing trip contact Brad Hill at:

seminars@naturalart.ca

Grizzly Cub – Brown on Green! Grizzlies of both sexes and all ages are found in the Khatzeymateen. In most years females avoid bringing first year cubs into the estuary owing to the threat posed by large male bears.
